Mold Cavity Pressure Sensor

Unisens® with Front ø4 mm

Quartz sensor for cavity pressures up to 2 000 bar for injection molding of plastics.

- ideally suited for industrial applications
- sensor front can be machined to adapt to the cavity wall (except for coated versions of the sensor)
- exchangeable cable

Description

The Unisens quartz sensor for mold cavity pressure Type 6157BE... has a front diameter of 4 mm. An O-ring seals the annular gap of <10 µm between sensor and mounting bore and thereby also center aligns the sensor in the bore.

The pressure acts over the entire front of the sensor and is transmitted to the quartz measuring element, which produces a proportional electric charge (pC = Picocoloumb). This is converted into a voltage 0 ... 10 V in the amplifier and is then available as an amplifier output.

All parts of the sensor are corrosion-resistant. The exchangeable cable is screwed to the sensor with a tight seal. The connector is self-locking and splash-proof.

For multi cavity applications the sensor Types 6157BA... and 6157BC... are used without the single-wire connector Typ 1839. The Multi Cavity Set Type 6829A... and the Multi Sensor System Type 6831B... are described in the appropriate data sheets.

This sensor is available with several Types of connecting cables (see page 2).

Application

This diaphragm-free sensor measures mold cavity pressures up to 2 000 bar during injection molding. It is particularly suitable for optimizing, monitoring and controlling the injection molding process of thermoplastics, elastomers, thermosets and SMC.

For abrasive melts (e.g. filled with glass fibers or carbon fibers, thermosets, BMC/SMC), these sensors are available as Types 6157BCE (0 ... 200 °C)/BD... (0 ... 300 °C) with a hardcoated front.

* During machine down time the mold temperature may rise up to 240 °C, without causing any damage to the sensor. Note that measuring errors may temporarily result.
Pressure Sensor Type 6157BA... and Type 6157BC...

Sensor including an exchangeable high temperature cable with a connector for operating temperatures up to 200 °C.

Pressure Sensor Type 6157BB... and Type 6157BD...

Sensor including an exchangeable steel-braided Kapton cable (Polyimide) with connector for operating temperatures up to 300 °C (Connector 200 °C).

Pressure Sensor Type 6157BAE and Type 6157BCE with Cut-and-Grip-Connector

Alternative version of the sensor with single-wire technique for simplified and flexible installation in the mold. The sensor Type 6157B...E is equipped with a single-wire cable with a very small cross-section. The single-wire cable is exchangeable and can be cut to length as required by the user. With the single-wire technique the electrical shielding is provided by the mold. Both the cable and the connector therefore have to be completely integrated into the mold. For easy installation a connector is supplied which is self locking and splash proof.

Special Versions
Coated front (abrasion protection)
- Type 6157BA... with coated front: Type 6157BC...
- Type 6157BB... with coated front: Type 6157BD...

Installation
The sensor is normally fixed in the mounting bore with the mounting nut (Type 6457), but a spacer sleeve (Type 6459) can also be used.

The sensor front forms part of the cavity wall. The sensor should therefore be adapted so that its front comes exactly flush with the cavity wall. Its front can be machined up to 0,5 mm (except with a coated front!). Full details can be found in the operating instructions.

The sensor is center aligned in the 4 H7 bore.

The single-wire cable must be installed completely in the mold. This connector is fitted in the mounting plate and this secured in a recess in the mold. The identification plate should be fixed nearby, indicating the type of sensor and its sensitivity.

Accessories Included

- Mounting nut Mat. No./Type 6457
- Mounting plate (for sensor with cable only) 65005208
- Identification label 3.520.899
- Connector (for single-wire technique only) Type 6157BCE and Type 6157BAE 1839
- O-ring, diameter 2.5x0.65 mm, (only for Type 6157BA...) 1100A57
- O-ring, diameter 2.5x0.65 mm, (only for Type 6157BB...) 1100A67

Optional Accessories

- O-ring tool for exchanging the cable 1364
- High temperature extension cable, Viton®, Fischer SE102A014 – BNC pos., Length 2 m 1667B2
- High temperature extension cable, sheathed in steel braiding, Fischer SE102A014 – TNC pos., Viton, Length 2 m 1672B2
- Dummy sensor 6545
- Spacer sleeve (L = 70 mm) 6459
- 4-channel connector for Type 6157B...G and G1 1708A...
- 8-channel connector for Type 6157B...G and G1 1710A...
- Contact elements 1-channel for single-wire sensor only 1712A0
- Contact elements 4-channel for single-wire sensor only 1714A0
- Two-wire coaxial cable Teflon® (Unisens green) 0 ... 200 °C as replacement cable for sensors Type 6157BA... and Type 6157BC... 1645C...
- Steel-braided two-wire-Teflon cable 0 ... 200 °C as a wear resistant substitute for Type 1645C... 1963A...
- Steel-braided Kapton® cable 0 ... 300 °C as replacement cable for sensors Type 6157BB... and Type 6157BD... 1955A...
- Single wire cable (Unisens green) with M4 connector, 1.5 m length 1666A2
- Single wire cable (Unisens green) with M4 connector, 5 m length 16664
- Crimped pin 65003747
- Crimpset with tools 1381A0

Checking Tools

- Limit plug gage, diameter 4 mm, tolerance H7.5.210.162 7.110.300
- Checking tool

Mounting Accessories

- Extraction tool 1315A
- Mounting piece for connector 1401
- Mounting wrench 1383
- Extraction tool for Type 6157BB/BD... 1362A
